Maths Time Tables

Focus on the 5 times table for a test next week.

This week we are practising the six times table. We need to recall these facts quickly in lots of different ways. Don't just learn to chant: 6, 12, 18, 24, 30, 36, 42, 48, 54, 60, 66, 72. Instead, practise things like...

There are 9 sixes in ____.

30 divided by 6 is...

3 multiplied by 6 is ____.

Reading

Please make sure you are reading for 20 minutes at least three times a week. Discuss what you are reading with an adult or older sibling at home.

What are you enjoying about the book? Are there any tricky words? Do you have any questions about the story?

Discovery

This half term we will be learning about the topic: **Inventions that changed the World!**

Over the next half term, how creative can you be? Your task is to design your own Invention!

Using junk modelling, think about the world's greatest inventions and how they have had an impact on today's society.

What will you invent? A new way to communicate? Something to rival the invention of the wheel? A new spaceship maybe? Remember to bring them in for our final week so we can show them off to our year.

Grammar

Write the letter from the box to show which word is:

an adjective a verb a noun

A

B

C

The kitten climbed up the tall tree and was stuck there all morning.

Complete this sentence with a subordinate clause.

I will tidy my room while _____

_____.
